

## Go Solar

**5,500 lbs!**

Install solar panels on your home and put a huge dent in your carbon footprint: 5,500 lbs!

*In just one minute, the sun sends enough solar power to the earth to meet everyone's energy needs for a whole year!*

Plus, when you generate more solar power than you need, you can give back clean energy to others for even greater utility savings!

For more info visit: **[www.seia.org](http://www.seia.org)**  
(it's the non-profit Solar Energy Association)
